

Success Path for Angular retake

By Brad Gillespie, Instructor

Success path for Java...

Read Requirements. Twice.

Think about TEST

Write UML Diagram to understand requirements.

NOW Write test.

Brad Gillespie's List of what to test. in Test-Driven Development

1 Instantiation - Can I make one... also call Smoke Test

2 Negative Conditions - 404, neg or "wrong data"

3 Extremes - I test of 3 billion

4 Border conditions - before and after a time

5 Delta - change - or Happy Path

//Arrange

//Act

//Assert

Get together with others and fix or redo Assessment.

Find the coding Kata - Tour of Heros... - find a YouTube video - type along

Do or re-do chapter 11 cars. tDD

Do the ETF

Shopping cart...

Read requires, Twice...

Write out on paper class diagram...

Bonus:

Make your tests. Evergreen. test will work, today, tomorrow and two years from now

Even if the data changes.
