https://www.linkedin.com/in/wsdfirm/ find me. Watch the video by students. This can help you.

Success path to be "Desk Ready, Day One" – or to master any language or system.

Read Requirements. Twice.

Think about TEST

Write a UML Diagram to understand requirements.

NOW Write a test.

Brad Gillespie's List of what to test. in Test-Driven Development

1 Instantiation - Can I make one… also call Smoke Test

2 Negative Conditions - 404, neg or "wrong data"

3 Extremes - I test 3 billion.

4 Border conditions - before and after a time

5 Delta - change - or Happy Path

      //Arrange

      //Act

      //Assert

Get together with others and fix or redo your Assessment.

Find the coding Kata - Tour of Heros... - find a YouTube video - type along.

Do or re-do Chapter 11 cars. TDD

Do the ETF practice hackathon.

Shopping cart... as a hackathon

Read requires, Twice...

Write out on paper a class diagram...

Bonus:

Make your tests Evergreen. Tests will work today, tomorrow, and two years from now.

Even if the data changes.

In Angular, what do you do First:

npm Test

ng e2e

Then
   ng serve - - o
